Project Summary and Justification

Department	Public Works					
Division	Street Operations					

Project 1 Proposed Southeast Maintenance Facility

The existing facility at 3180 South Street has additional needs with very limited room for expansion, conflicts with its residential neighborhood setting and poor access to the facility. With continued City growth to the south and east over the years, this site finds itself with long travel times in trying to respond to the needs within its' southeast district boundaries. A facility study, completed in 1998, studied all three current district sites (3200 Baldwin Ave., 3180 South St., and 901 North 6th St.) and makes recommendations for necessary needs and changes in the future. One need that was identified is the need for a future maintenance facility to be located in the south and east section of the City that has seen and continues to see rapid growth.

The site at 56th & London Road that had been under consideration has been rejected as not desirable because of flood way, flood plain issues. A new site will need to be selected within the southeast district boundaries.

Project 2 Gasboy Card Control System Replacement

Upgrade of gas cards control to the existing Gas Boy fuel sites is needed for continued use to its customers. The old system is obsolete and in need of upgrading. Parts for this system are not available.

Lincoln CIP 2002 - 2008

Public Works Maintenance

List of Projects Department: Public Works / Street Operations **Project Project** Number Title (1) UNL/In-house Facility Study reflects the need for a proposed southeast maintenance facility. Development of a satellite site is proposed initially (cold storage) with future development of the site as the City continues it's south and east growth. A new facility site will be selected within Southeast District boundaries. Gasboy card control system needs replaced at the various fuel sites. The system is obsolete and (2) parts for repair are not available.

^{*}Project number in parenthesis indicates project is not shown on the map.
